

# Insta-Berm™ (L-Rod)

## About

Even on temporary sites, secondary containment should be a high priority. This is because the EPA enforce sanctions on those operators that fail to meet their requirements. Our Insta-Berm is ideal for convenient but effective spill prevention. L-shaped rods support the industrial-strength fabric walls, making it extremely quick to put up and tear down.

It is ideal for deployment underneath fuel tanks or oil drums, forming a reliable barrier between harmful run-off and the environment. Like all of our products, it meets our internal quality assurance controls. In addition, it also meets the EPA regulation 40CFR112.7.

## Features

- L-shaped rods hold up walls, but also fold down easily for entry and exit
- Fully collapsible meaning it's easy to transport and store
- Wall design allows vehicles or mobile equipment to be driven in and out of berm
- Helps companies avoid stiff penalties from non-compliance of EPA standards
- Instant deployment without any tools
- Wide range of standard sizes available
- Also available in custom dimensions
- It is easy to clean, fold and store for reuse
- Very cost efficient compared to air-inflated models
- Appropriate for waste water, petroleum products and various other chemicals

## Sizes

- 10'x10'x12"
- 10'x15'x12"
- 10'x20'x12"
- 10'x25'x12"
- 10'x50'x12"
- 12'x12'x12"
- 12'x26'x12"
- 12'x36'x12"
- 12'x50'x12"
- 20'x20'x12"
- 20'x50'x12"

\*Custom sizes available by request. Also available with a 6" or 15" wall

## Fabric Options

CHEM-SHIELD	FIRE RESISTANT ARCTIC-SHIELD
30 oz	26.5 oz / 36 oz
Interpolymer Alloy	Thermal Polyurethane
Down to -31° F	Down to -65° F
Widest range of chemical compatibility	Fire resistant per NFPA 701
